Career and Technical Education

Since 1933

Orange County Public Schools has been making history and changing lives through education by providing career and technical training for tens of thousands of students in Central Florida. Offering programs at five technical college campuses, as well as numerous community learning centers and district schools, Orange Technical College continues to grow and evolve, always focused on improving the lives of students and positively impacting workforce needs and economic development in the region.

Why Choose Orange Technical College?

Quality

OTC is part of Orange County Public Schools, a high-performing school district committed to student success.

Staff

Our credentialed faculty and staff prepare every student for success through innovative learning styles, interactive classrooms and industry knowledge

Flexibility

In addition to our five campuses, we offer a variety of courses with flexible schedules at Adult Community Education (ACE) centers all throughout Orange County.

Time

Many of our programs can be fully completed in just one year or less, getting students in high skill, high-wage jobs faster than ever.

Financial Aid

Students are assisted by our financial aid offices to make sure they receive any and all aid based on eligibility.

Accreditation

Our campuses are accredited by the Southern Association of Colleges and Schools and the Council on Occupational Education.

Cost

As a public institution, we offer all students the most affordable education with the lowest rates for tuition.

Financial Aid & Veteran Benefits

Financial aid is available at all Orange Technical College campuses and is based on individual student need or merit criteria.

The Financial Aid office will help determine eligibility for various types of assistance.

There are many types of financial assistance available including federal and state grants, work-study, scholarships and veteran benefits. In addition, there are numerous agencies that provide assistance for educational career training to help offset educational costs.

Careers

Orange Technical College prepares students for various careers and provides programs of study ranging in length from a couple of months to a year or more.

Did You know...

*Florida residents pay only **\$2.92** per clock hour for Career Certificate Programs?*

**Non -Florida residents pay \$11.71/hr*

Adult General Education

Adult Education offers a wide variety of courses providing rigorous and relevant learning experiences to meet the educational needs of adults through literacy, high school completion, workforce preparation and technology.

The various courses and services offered through Adult General Education (AGE) include English for Speakers of Other Languages (ESOL) GED® Preparation & Testing, Adult High School Credit and more.

PS** ORANGE
TECHNICAL COLLEGE

ADULT GENERAL EDUCATION

Adult Basic Education (ABE)

Location: All Campuses

Offered: Days/Eves

The Adult Basic Education program is designed to provide adults with sufficient basic education to enable them to benefit from job training and retraining programs, and to obtain and retain productive employment. A student must demonstrate proficiency in 100% of the basic academic standards to earn a literacy completion point (LCP). An LCP is the attainment of academic or workforce readiness skills that qualify the participant for further basic education, vocational education or employment.

Adult ESOL College and Career Readiness

Location: All Campuses

Offered: Days/Eves

The purpose of this program is to improve the advanced ESOL students' ability to communicate in English, and allow them to acquire secondary level English language skills.

Adult High School Credit

Location: South Campus

Offered: Days/Eves

The purpose of this program is to provide an academic course of study leading to a high school diploma for those 16 years of age and older. Adult high school credit is a course of study designed for adults who have not completed high school to continue their education. The mission of this program is to prepare students for the completion and attainment of a high school diploma and to meet the educational needs of the students by providing assistance in making individual career choices.

Applied Academics for Adult Education (AAAE)

Location: All Campuses

Offered: Days/Eves

The AAAE program is offered to students who have tested at the equivalent of 9th grade and above but need to improve their basic skills to meet the requirements of a CTE program in which they are enrolled. This program is characterized by self-paced instructional modules related to the student's occupational goal and learning styles, flexible scheduling, and performance-based evaluation.

ADULT GENERAL EDUCATION

English for Speakers of Other Languages (ESOL)

Location: All Campuses

Offered: Days/Eves

This program is for students whose native, or home, language is other than English. ESOL classes are available for students who don't speak English or have limited skills in reading, writing, and speaking English. Students are pre-tested to determine their ability and begin their studies at that level.

GED® Preparation Classes

Location: All Campuses

Offered: Days

GED® Preparation Classes help you successfully pass the GED® Test. The classes include instruction and coursework in the four tested content areas: Reasoning Through Language Arts, Mathematical Reasoning, Science and Social Studies. Successful completion is determined by passing all the content areas on the Official GED® Examination with a minimum score of 145 in each content area.

Apprenticeship

The mission of this program is to provide an atmosphere of unified learning and skills development, through classroom instruction and “on-the-job” experience, assuring a lifelong earning opportunity to a diverse community.

How to Become an Apprentice

Check with the admissions office at any of the Orange Technical College campuses. Potential candidates must apply for registered apprentice positions. Admission requirements and eligibility vary by program because program sponsors define them according to their specific training needs and the availability of employment opportunities. However, federal law defines minimum requirements and mandates that selection criteria be job related.
